

Structural Integrity Associates, Inc. Appoints Joe Agnew as Director of NDE Products

20-year Non-Destructive Testing Sales, Strategy and Marketing expert joins Structural Integrity Associates to foster growth within the TSU NDE Services Division

For Immediate Release
August 18, 2014

San Jose, California –Structural Integrity Associates announced that Joe Agnew joined the company as Director of NDE products based out of the Huntersville, NC office. In this newly created role, he will be responsible for leveraging all existing NDE products and services across multiple markets, evaluating new and upcoming technologies for integration into Structural Integrity and identifying strategic partners and acquisitions to help grow the company. Agnew will report to Structural Integrity Vice President, Harold Queen. He is joining Structural Integrity from Zetec, Inc. where he was the USA Sales Manager for all Phased Array UT and Eddy Current products manufactured in North America.

Joe Agnew
Director of NDE Products
Structural Integrity Associates

Queen shared “We are very pleased to have Joe join Structural Integrity. Expanding our NDE Services offering is a key component of our overall growth strategy and having Joe lead this endeavor for our NDE Products and Services is a tremendous benefit for Structural Integrity. As Structural Integrity looks to broaden its NDE and Consulting Services market penetration, we’ll rely on Joe’s expertise to help guide us in achieving our sustainable growth objective. His formal training, industry experience and strong management skills will be a valuable asset to Structural Integrity and to our clients.”

“I am excited to join Structural Integrity, a company synonymous with providing high quality services and placing the client first. I have always admired Structural Integrity; whether it was competing against them in the field service market or providing Structural Integrity with industry leading instrumentation to further enhance its

well respected brand reputation. I look forward to the challenges of growing such a well-respected and vital organization in the NDE community” Agnew said.

Agnew’s top priorities will be to continue to grow depth and breadth to Structural Integrity’s integrated NDE service solutions for power generation while forging new collaborative efforts in markets such as oil and gas, chemical, government and transportation. “The goal will be to create additional sustainable offerings for Structural Integrity in non-destructive testing that are in-line with client needs and expectations” Agnew added.

Before joining Structural Integrity, Agnew spent the past 17 years working for both NDE field service and product development companies. In his last role at Zetec, Agnew was USA Sales Manager for all Phased Array UT and Eddy Current products. His responsibility included helping different firms in nuclear, fossil, oil and gas, government and transportation to stay ahead of the technology curve.

Agnew’s first day with Structural Integrity Associates was August 4, 2014 and he can be reached at jagnew@structint.com.

About Structural Integrity Associates, Inc.

Structural Integrity Associates, Inc. is an internationally recognized leader in the prevention and control of structural and mechanical failures, with a strong presence in the power generation industry. With headquarters in San Jose, CA, Structural Integrity serves clients worldwide through branch offices located throughout the US and Canada, as well as through affiliates located in China, Taiwan, Korea, Switzerland and Spain. Structural Integrity’s expertise encompasses a broad range of issues critical to the commercial success of both fossil-fired and nuclear power plants, including boiler integrity management, root cause analysis and data management programs that have become vital to the continued operation of Fossil power plants worldwide.
